---

## Education

University of Bahrain, Sakir  
Bachelor of Cybersecurity  
2022 - Current

---

## Skills

- **Tools:** Autopsy, ProDiscover, Wireshark, PRTG, OpManager, Cisco Packet Tracer
  - **Programming:** Python, Java, PHP
  - **Technical Skills:** Ethical Hacking, Database Management, Cryptography, AWS Cloud Security, Microsoft Office
  - **Soft Skills:** Communication, Teamwork and Collaboration, Leadership, Problem-solving, Ability to Work Under Pressure
- 

## Hobbies and Interests

- Learning new technologies
- Problem-Solving
- Reading

## Summary

Cybersecurity student with hands-on experience in security tools and labs, interested in protecting systems and analyzing risks, supported by certifications and project work. I have knowledge of network security, web vulnerabilities, and common cyber threats, with practical experience gained through labs and academic work. I am eager to continue learning and gain real-world experience in cybersecurity.

## Languages

- Arabic: Native
  - English: Fluent
  - French: Beginner
  - Turkish: Beginner
- 

## Certifications

- ISC2 – Certified in Cybersecurity (CC)
  - Cisco – Introduction to Cybersecurity
  - Palo Alto Networks – Cybersecurity Fundamentals
  - Coursera – Cybersecurity Awareness for Everyone
  - Hands-on-Cybersecurity Labs – TryHackMe
- 

## Projects

- **Corporate CyberAware (Senior Project)**

A web-based cybersecurity awareness system currently under development, designed to assess employee security awareness and improve their understanding of cyber risks.

- **Campus Hub Web Module**

Developed a web-based module as part of a campus platform, including frontend design and integration with a PHP backend API hosted on Replit.

- **Python API Integration Project**

Developed a Python application that integrates with an external API to retrieve and process data.
